

New Safety Guidelines for Users of NRF in view of COVID-19

1. Only online booking is allowed for the sample characterization.
2. Users are not allowed to enter the characterization lab.
3. User should contact head TA/TA of the available equipment on phone for the details of the study.
4. Sample has to be dropped to the NRF office in the sample box after putting sample and user details. UV Sensitization of the samples will be done. Samples whose UV sanitization is not possible, such samples must be kept for one week before the measurement start (contact head TA/TA).
5. Data of the measurement will be sent to user by TA through e-mail.
6. The detail of the head TA/TA for the available equipment is given in the notice board and also on the NRF website.
